D. Workplace productivity, business workflow, and innovation and research	✔ Correct	Not selected

▼ Question 2

Multiple Choice

Time to answer: 53 seconds

Answer status: ✔ Correct

Question

What is the primary advantage of AWS Generative AI Competency Partners?

Answer options

Option	Correct answer	Your selection
A. They offer the lowest prices for AI services		Not selected
B. Their expertise and success in implementing generative AI solutions has been validated by AWS	✔ Correct	Selected
C. They can bypass all AWS security protocols		Not selected
D. They have exclusive access to AWS resources		Not selected

▼ Question 3

Multiple Choice

Time to answer: 30 seconds

Answer status: ✔ Correct

Question

What does AWS envision as the future of AI agents?

Answer options

Option	Correct answer	Your selection
A. Replacing human workers entirely		Not selected
B. Working alongside humans in various settings	✔ Correct	Selected
C. Operating only in consumer settings		Not selected
D. Being limited to simple, single-step tasks		Not selected

▼ Question 4

Multiple Choice

Time to answer: 33 seconds

Answer status:  Correct

Question

According to the Agentic AI Maturity Scale, what is the highest level of agency?

Answer options

Option	Correct answer	Your selection
A. Rule-Based RPA		Not selected
B. Fully autonomous agentic systems	 Correct	Selected
C. Goal-Driven AI agents		Not selected
D. Generative AI Assistants		Not selected

▼ Question 5

Multiple Choice

Time to answer: 45 seconds

Answer status:  Correct

Question

Which approach is recommended for sales professionals when identifying customers interested in AI automation?

Answer options

Option	Correct answer	Your selection
A. Focusing primarily on technical specifications		Not selected
B. Proposing solutions without understanding specific use cases		Not selected

D. Avoiding discussions about potential risks		Not selected

▼ Question 6

Multiple Choice

Time to answer: 19 seconds

Answer status:  Correct

Question

What is a key feature of Amazon Bedrock in relation to AI development?

Answer options

Option	Correct answer	Your selection
A. It provides unlimited free storage for AI models		Not selected
B. It replaces the need for any custom coding in AI development		Not selected
C. It automatically generates production-ready AI applications		Not selected
D. It offers access to various foundation models from different providers	 Correct	Selected

▼ Question 7

Multiple Choice

Time to answer: 38 seconds

Answer status:  Correct

Question

How do AWS Partners with Generative AI Competency impact customer implementation success?

Answer options

Option	Correct answer	Your selection
A. They increase production deployment rates by 30%	 Correct	Selected
B. They lower operational costs by 30%		Not selected
C. They improve system performance by 30%		Not selected
D. They reduce implementation time by 30%		Not selected

▼ Question 8

Multiple Choice

Time to answer: 28 seconds

Answer status:  Correct**Question**

How does the new API-based delivery model launched by AWS benefit organizations?

Answer options

Option	Correct answer	Your selection
A. It provides free AI services to all customers		Not selected
B. It simplifies access to partner solutions through API calls	 Correct	Selected
C. It replaces all existing software with AI agents		Not selected
D. It enables direct access to AWS internal systems		Not selected

▼ Question 9

Multiple Choice

Time to answer: 16 seconds

Answer status:  Correct**Question**

What is the primary purpose of Amazon Bedrock AgentCore?

Answer options

Option	Correct answer	Your selection
A. To provide basic coding tutorials		Not selected
B. To deploy and operate AI agents securely at scale	 Correct	Selected
C. To offer cloud storage solutions		Not selected
D. To manage human resources in AI companies		Not selected

▼ Question 10

Multiple Choice

Time to answer: 56 seconds

Answer status:  Correct**Question**

What is one of the key capabilities that Amazon Bedrock offers for AI development?

Answer options

Option	Correct answer	Your selection
A. Free unlimited cloud storage for AI models		Not selected
B. Data customization tools to tailor AI to specific businesses	 Correct	Selected
C. Direct integration with social media platforms		Not selected
D. Automatic code generation for all AI applications		Not selected

▼ Question 11

Multiple Choice

Time to answer: 37 seconds

Answer status:  Correct**Question**

What does the course suggest as a key capability that technical teams need to develop for AI agent systems?

Answer options

Option	Correct answer	Your selection
A. Basic programming skills		Not selected
B. Advanced database administration		Not selected
C. Understanding the unique architecture of agent-based systems	 Correct	Selected
D. Cloud infrastructure management		Not selected

▼ Question 12

Multiple Choice

Time to answer: 1 minutes 22 seconds

Answer status:  Correct**Question**

Which value proposition does agentic AI deliver to organizations according to the course?

Answer options

Option	Correct answer	Your selection
A. Autonomous process orchestration and decision-making	✔ Correct	Selected
B. Simplified data center management		Not selected
C. Lower hardware costs for computing		Not selected
D. Reduced need for employee training		Not selected

▼ Question 13

Multiple Choice

Time to answer: 6 seconds

Answer status: ✔ Correct

Question

Which capability of Amazon Bedrock AgentCore allows AI agents to remember past interactions?

Answer options

Option	Correct answer	Your selection
A. Memory	✔ Correct	Selected
B. Gateway		Not selected
C. Runtime		Not selected
D. Identity		Not selected

▼ Question 14

Multiple Choice

Time to answer: 10 seconds

Answer status: ✔ Correct

Question

What is the primary difference between generative AI and agentic AI in decision-making?

Answer options

Option	Correct answer	Your selection
A. Generative AI makes all decisions autonomously		Not selected
B. Generative AI provides suggestions, while agentic AI makes autonomous choices	✔ Correct	Selected
C. Agentic AI requires constant human input		Not selected
D. There is no significant difference in decision-making capabilities		Not selected

▼ Question 15

Multiple Choice

Time to answer: 40 seconds

Answer status: ✔ Correct

Question

What is the primary challenge that agentic AI addresses, according to the market opportunity section?

Answer options

Option	Correct answer	Your selection
A. The need for better data storage solutions		Not selected
B. The shift from isolated AI tools to interconnected, autonomous systems	✔ Correct	Selected
C. The lack of skilled AI developers in the market		Not selected
D. The high cost of traditional software licenses		Not selected

▼ Question 16

Multiple Choice

Time to answer: 16 seconds

Answer status: ✔ Correct

Question

Which of the following is described as a key enabler for transforming agentic AI from hype to reality?

Answer options

Option	Correct answer	Your selection
A. Advanced model reasoning capabilities	✔ Correct	Selected
B. Quantum computing infrastructure		Not selected
C. Virtual reality integration		Not selected
D. Blockchain technology		Not selected

▼ Question 17

Multiple Choice

Time to answer: 32 seconds

Answer status: ✔ Correct

Question

Which AWS service is described as a comprehensive, secure, and flexible service for building generative AI applications and agents?

Answer options

Option	Correct answer	Your selection
A. Amazon EC2		Not selected
B. Amazon Bedrock	✔ Correct	Selected
C. Amazon SageMaker AI		Not selected
D. Amazon RDS		Not selected

▼ Question 18

Multiple Choice

Time to answer: 9 seconds

Answer status: ✔ Correct

Question

What is context persistence in relation to AI agents?

Answer options

Option	Correct answer	Your selection
A. Resetting the agent's memory after each task		Not selected
B. The ability to forget all previous interactions		Not selected
C. Maintaining and learning from past interactions to improve future outcomes	✔ Correct	Selected
D. Limiting interactions to a single context		Not selected

▼ Question 19

Multiple Choice

Time to answer: 13 seconds

Answer status: ✔ Correct

Question

What is a key characteristic of agentic AI?

Answer options

Option	Correct answer	Your selection
A. It only works with structured data		Not selected
B. It requires constant human supervision		Not selected
C. It is limited to text-based interactions		Not selected
D. It demonstrates true agency and autonomous behavior	✔ Correct	Selected

▼ Question 20

Multiple Choice

Time to answer: 33 seconds

Answer status: ✔ Correct

Question

What is the primary benefit of using AWS Marketplace for AI agent solutions?

Answer options

Option	Correct answer	Your selection
A. It streamlines procurement and deployment while providing security and control	✔ Correct	Selected

B. It replaces the need for in-house developers

Not selected

C. It offers unlimited storage for AI models

Not selected

D. It provides free AI agents for all users

Not selected
